1. LOGIN PAGE

Super Admin has a SEPARATE login URL

Super Admin login: URL

Login Page Fields:

- Email
- Password
- **2FA Code (Mandatory)** — Google Authenticator or similar. Super admin must always use two-factor authentication. No exceptions.

Additional Security:

- IP Whitelisting — only allow login from your specific IP addresses
- Login attempt limit — 3 failed attempts locks the account for 30 minutes
- Every login recorded with timestamp, IP address, device
- Suspicious login (new IP/device) sends immediate email alert to you

After Login:

- Session timeout after 30 minutes of inactivity
- Cannot be logged in on multiple devices simultaneously
- All actions logged with timestamp

2. SUPER ADMIN DASHBOARD

Section 1 — Platform Health Bar (Top of page, always visible)

A thin bar at the very top showing system status:

● API: Healthy
● Database: Healthy
● Storage: 234GB/500GB
● Uptime: 99.8%
●Active Sessions: 47
● Last Deploy: March 28, 2026

If anything goes wrong this bar turns red immediately.

Section 2 — Business KPI Cards (Your Revenue & Growth)

These are business metrics as the VEERHA platform owner:

Card	What It Shows
Total Clients	24 active clients
Monthly Recurring Revenue	₹4,82,000/month
Annual Recurring Revenue	₹57,84,000/year
New Clients This Month	3
Churned Clients This Month	0
Trial Clients	5
Overdue Payments	2 clients
Platform Growth %	+12% vs last month

Section 3 — Platform Usage Stats

How much that the platform is being used across all clients:

Metric	Count
Total Warehouses (across all clients)	47
Total Active Users	312
Total SKUs Managed	18,432
Total Orders Processed This Month	8,921
Total GRNs This Month	1,243
Total Stock Value Managed	₹12.4 Crore
API Calls Today	1,24,832
Storage Used	234 GB

Section 4 — Client Health Overview

Quick view of all clients and their status:

Client	Plan	Warehouses	Users	Last Active	Status	Payment
Raj Logistics	Pro	5	23	2 mins ago	Active	Paid
Kumar Trading	Starter	1	4	1 hour ago	Active	Paid
ABC Cold Storage	Enterprise	12	67	3 hours ago	Active	Paid
XYZ Distributors	Pro	3	11	2 days ago	Inactive	Overdue
New Client Co	Trial	1	2	Just now	Trial	—

Color coded:

- Green — Active, paid
- Yellow — Inactive or payment due soon
- Red — Overdue payment or suspended
- Blue — Trial

Section 5 — Recent Platform Activity

Live feed of important events across ALL clients:

2 mins ago — New client "Raj Logistics" signed up (Pro Plan)
5 mins ago — Client "Kumar Trading" added 2 new users
12 mins ago — Client "ABC Cold Storage" upgraded from Starter to Pro
1 hour ago — failed login attempt on client "XYZ" (3 times, locked)
2 hours ago — Client "New Co" trial expires in 3 days
3 hours ago — Payment received from "Raj Logistics" ₹24,000
5 hours ago — Support ticket raised by "Kumar Trading"

Section 6 — Alerts & Issues (Attention Needed)

CRITICAL (red)

- Client "XYZ Distributors" payment overdue by 15 days
- Database storage at 78% capacity — plan upgrade needed

WARNING (yellow)

- 3 client trials expiring this week
- Client "ABC Cold Storage" approaching user limit (47/50)
- API usage spike detected on Client "Raj Logistics"

INFO (green)

- 2 new support tickets pending response
- Scheduled maintenance due next Sunday

3. CLIENT MANAGEMENT MODULE

This is where we manage every single client on our platform.

Client List Page

Header stats:

- Total Clients
- Active Clients
- Trial Clients
- Suspended Clients
- Total MRR

Search and filters:

- Search by company name, email, phone
- Filter by Plan (Starter/Pro/Enterprise)
- Filter by Status (Active/Trial/Suspended/Churned)
- Filter by Payment Status (Paid/Overdue/Failed)

Client table columns:

- Company Name
- Contact Person
- Email
- Phone
- Plan
- Warehouses (count)
- Users (count)
- Joined Date
- Last Active
- Payment Status
- Status
- Actions (View / Edit / Suspend / Delete)

Create New Client Page

When i onboard a new client, I need to fill this form:

Company Details:

- Company Name
- Company Type (Manufacturer / Distributor / Retailer / 3PL / Cold Storage / E-commerce)
- GST Number
- PAN Number
- Address (Street, City, State, Pin, Country)
- Industry (FMCG / Electronics / Pharma / Textile / Auto Parts / Agriculture / Other)

Primary Contact:

- Contact Person Name
- Designation
- Email (this becomes their Admin login)
- Phone
- WhatsApp Number

Plan & Billing:

- Plan (Starter / growth/Professional / Enterprise)
- Billing Cycle (Monthly / Quarterly / Annual)
- Plan Start Date
- Trial Period (0 / 7 / 14 / 30 days)
- Custom Pricing (if negotiated differently from standard)
- Payment Method (Bank Transfer / Razorpay / Cheque)

System Setup:

- Auto-generate Admin credentials — Yes/No
- Send welcome email — Yes/No
- Default timezone — Asia/Kolkata

- Default currency — INR
- Default language — English

Limits (based on plan & also customizable)

- Max Warehouses allowed
- Max Users allowed
- Max SKUs allowed
- Storage limit (GB)
- API calls per day limit

When I click **Create Client:**

- System creates their isolated tenant/account
- Admin credentials auto-generated
- Welcome email sent with login URL, email, temporary password
- Client appears in your client list

Client Detail Page

When i click on any client I should see their complete profile:

Tabs on client detail page:

Tab 1 — Overview

- All company details
- Current plan and usage
- Quick stats (warehouses, users, orders this month)
- Account health score (based on activity, payment, usage)
- Edit company details button

Tab 2 — Subscription & Billing

Current plan details:

Plan: Pro
Price: ₹24,000/month
Billing Cycle: Monthly
Next Billing Date: April 1, 2026
Payment Method: Razorpay
Status: Active ✓

Usage vs. limit:

Warehouses: 3/5 used
Users: 11/15 used
SKUs: 2,341/5,000 used
Storage: 4.2GB/20GB used
API Calls: 12,430/50,000 today

Billing history table:

Date	Invoice #	Amount	Status	Action
Mar 1, 2026	INV-2341	₹24,000	Paid	Download
Feb 1, 2026	INV-2198	₹24,000	Paid	Download
Jan 1, 2026	INV-2056	₹24,000	Paid	Download

Actions:

- Upgrade Plan
- Downgrade Plan
- Change Billing Cycle
- Apply Discount/Coupon
- Pause Subscription
- Cancel Subscription
- Generate Invoice Manually
- Record Manual Payment

Tab 3 — Users

All users of this client across all their warehouses:

Name	Email	Role	Warehouse	Last Active	Status
Wasim	admin@client.com	Admin	All	5 mins ago	Active
Priya Sharma	priya@client.com	Manager	Hyderabad Hub	1 hour ago	Active
Ramesh Kumar	ramesh@client.com	Worker	Hyderabad Hub	2 hours ago	Active

Actions you can do:

- Reset any user's password
- Force logout any user
- Disable/Enable any user
- Change any user's role
- View any user's activity log

Impersonate User button — extremely powerful. Let’s you log in AS that user to see exactly what they see, to debug issues or help with support. More on this later.

Tab 4 — Warehouses

All warehouses this client has created:

Warehouse	Location	Type	Capacity	Utilization	Status
Hyderabad Hub	Hyderabad	Bonded	35,000	42%	Active
Chennai Main	Chennai	Distribution	50,000	67%	Active
Madurai Cold	Madurai	Cold Storage	20,000	23%	Active

We can view but not edit client's warehouse data unless they raise a support ticket.

Tab 5 — Activity Log

Every single action this client's users have ever done on the platform:

Mar 30, 2026 09:14 AM — admin@client.com — Created PO-234
Mar 30, 2026 09:02 AM — priya@client.com — Approved GRN-189
Mar 29, 2026 04:45 PM — ramesh@client.com — Completed Putaway PUT-067
Mar 29, 2026 02:30 PM — admin@client.com — Added new SKU SKU-892

Filter by: User / Module / Action Type / Date Range

This is critical for debugging support issues — client says "something went wrong yesterday at 3 PM" — you can see exactly what happened.

Tab 6 — Support Tickets

All support tickets raised by this client:

Ticket #	Subject	Priority	Status	Created	Assigned To
TKT-234	GRN not linking to PO	High	Open	2 hours ago	You
TKT-198	Invoice PDF not generating	Medium	Resolved	3 days ago	You

Tab 7 — Notes

Internal notes about this client that only Super Admin can see:

Mar 15, 2026 — Client asked about custom integration with Tally.
Discussed in call. They want it by June.

Feb 20, 2026 — Payment was 5 days late this month.
Finance team called. They said it won't happen again.

Jan 10, 2026— Onboarded. Very tech - savvy team.
Minimal support needed.

Add Note button — you can add notes after every call or interaction.

4. SUBSCRIPTION & PLANS MANAGEMENT

Plans Configuration Page

Where you define your pricing plans:

Plan 1 — Starter

Price: ₹4,999/month or ₹49,999/year (2month free)
Warehouses: 1
Users: 5
SKUs: 1,000
Storage: 5 GB
API Calls: 1,000/day
Features enabled:

- Basic Inbound/Outbound
- Inventory Management
- Basic Reports

Plan 2 — Growth

Price: ₹12,999/month or ₹1, 19,999/year (2 months free)
Warehouses: 3
Users: 15
SKUs: 5,000
Storage: 20 GB
API Calls: 10,000/day
Features enabled:

- Everything in Starter
- Full inbound + Outbound + all picking strategies
- Cycle Count + stock transfer
- Serial Tracking
- Batch + Wave Picking
- All reports + Analytics
- API Access
- Priority email + Chat support

Plan 3 — Professional

Price: ₹24,999/month or ₹2, 39,999/year (2 months free)
Warehouses: 10
Users: 50
SKUs: 25,000
Storage: 100 GB

API Calls: 50,000/day
• Everything in Growth
• Zone Picking
• Custom Reports
• Tally/GST portal integration
• Dedicated account manager
• Phone + priority support

Plan 4 — Enterprise

Price: Custom (negotiated)
Warehouses: Unlimited
Users: Unlimited
SKUs: Unlimited
Storage: Custom
API Calls: Unlimited
Features enabled:

- Everything in Pro
- Zone Picking
- Custom integrations (Tally, SAP, carrier API, etc.,)
- Dedicated Account Manager
- SLA guarantee
- Custom Reports
- White labeling option
- On-premise deployment option

Super Admin can:

- Edit any plan's price
- Add/remove features from plans
- Create custom one-off plans for specific clients
- Apply discounts per client
- Create annual pricing (e.g., 2 months free on annual)

Feature Flags System

Every feature in VEERHA has an ON/OFF flag per client. This means:

- Client A on Starter plan — Wave Picking is OFF. They cannot see it.
- Client B on Pro plan — Wave Picking is ON. They can use it.
- Client C on Starter but you gave them Wave Picking as a trial — you can turn it ON just for them.

Feature Flags table:

Feature	Starter	Pro	Enterprise	Client Override
Single Order Picking	✓	✓	✓	—
Batch Picking	✗	✓	✓	—
Wave Picking	✗	✓	✓	—
Zone Picking	✗	✗	✓	—
Serial Tracking	✗	✓	✓	—
Cycle Count	✗	✓	✓	—
API Access	✗	✓	✓	—
Custom Reports	✗	✗	✓	—

Client Override column — We can manually turn any feature ON or OFF for any specific client regardless of their plan and useful for trials, demos, special deals.

5. IMPERSONATION — MOST POWERFUL SUPER ADMIN FEATURE

What Is It

You can log in AS any user of any client and see exactly what they see. Without knowing their password. Without them knowing you're there (or with a visible banner — your choice).

When to Use It

- Client raises a support ticket saying "this button doesn't work" — you impersonate them and see the exact problem
- Client says "I can't see my inventory" — you impersonate their admin and debug immediately
- Training a new client — you impersonate their account to walk them through setup
- Verifying a bug fix — impersonate affected user to confirm its fixed

How It Works

On Client Detail page → Users tab → any user row → **Impersonate** button

Clicking it opens a new browser tab logged in as that user. A thin red banner at the top says:

You are impersonating Wasim (admin@client.com) | Exit Impersonation

Everything you do while impersonating is logged separately in the audit trail as "Super Admin action via impersonation."

Security Rules for Impersonation:

- Every impersonation session is logged (who, which client, which user, start time, end time, actions taken)
- You cannot change passwords while impersonating
- You cannot delete data while impersonating
- Client's activity log shows impersonation sessions (transparent to client)

- Session automatically ends after 1 hour

6. SYSTEM CONFIGURATION MODULE

Settings that control the entire VEERHA platform.

Tab 1 — General Settings

- Platform name: VEERHA WMS
- Platform URL
- Support email
- Support phone
- Default timezone
- Default currency
- Default language
- Maintenance mode toggle (takes entire platform offline with custom message)
- Platform version display

Tab 2 — Email Configuration

- SMTP settings (your email server)
- From name: "VEERHA WMS"
- From email: noreply@veerha.com
- Support email: support@veerha.com
- Email templates (edit the HTML of every automated email)
- Test email button

Tab 3 — Security Settings

- Password policy (minimum length, complexity requirements)
- Session timeout duration
- 2FA — mandatory for Super Admin, optional/mandatory for clients
- IP whitelist for Super Admin
- Failed login lockout settings
- Data retention policy (how long to keep logs)

Tab 4 — Storage & Performance

- Current storage usage
- Storage per client breakdown
- CDN settings
- File upload size limits
- Backup schedule and status
- Last backup timestamp

Tab 5 — API Management

- Master API keys
- Rate limiting settings per plan
- API usage logs
- Webhook configurations
- API documentation link

Tab 6 — Integrations

- Razorpay (payment gateway) — configure keys (for example)
- SendGrid/AWS SES (email service) — configure (for example)
- Firebase/OneSignal (push notifications) — configure (for example)
- Tally integration settings
- GST portal integration
- Future: Delhivery, Blue Dart API keys

7. REPORTS & ANALYTICS MODULE (SUPER ADMIN LEVEL)

These are OUR business reports. Not the warehouse reports our clients see.

Business Reports:

Revenue Report:

- MRR trend (monthly recurring revenue over time)
- Revenue by plan type
- Revenue by client
- Churn rate
- New MRR vs Expansion MRR vs Churned MRR

Client Reports:

- Client acquisition over time
- Trial to paid conversion rate
- Average client lifetime
- Most active clients
- Least active clients (churn risk)
- Clients approaching limits (need upgrade)

Platform Usage Reports:

- Total orders processed per month across all clients
- Total GRNs per month
- Most used features
- Least used features
- API usage trends

- Storage growth trend

Support Reports:

- Tickets per month
- Average resolution time
- Most common issues
- Client satisfaction

8. SUPPORT TICKET SYSTEM

How Clients Raise Tickets

Inside their WMS — a Help/Support button → fills a form → ticket created in your Super Admin panel.

Ticket Management Page

Ticket list with:

- Ticket # and subject
- Client name
- Priority (Critical/High/Medium/Low)
- Status (Open/In Progress/Resolved/Closed)
- Created date
- Last updated

Inside each ticket:

- Full conversation thread between you and client
- Attachments (screenshots)
- Internal notes (only you see these)
- Link to client's activity log at time of issue
- Resolution notes
- Time to resolution tracking

Priority rules:

- Critical — system down, data loss, security breach → respond in 1 hour
- High — major feature not working → respond in 4 hours
- Medium — feature partially working → respond in 24 hours
- Low — question, enhancement request → respond in 48 hours

9. AUDIT LOG (SUPER ADMIN LEVEL)

Complete log of everything to do as Super Admin:

Mar 30, 2026 09:14 AM — Logged in from IP 103.x.x.x (Chennai)
Mar 30, 2026 09:18 AM — Viewed client "Raj Logistics" details
Mar 30, 2026 09:22 AM — Impersonated user admin@rajlogistics.com
Mar 30, 2026 09:35 AM — Ended impersonation session
Mar 30, 2026 10:02 AM — Changed plan for "Kumar Trading" Starter → Pro
Mar 30, 2026 10:15 AM — Created new client "ABC Warehousing"
Mar 30, 2026 11:30 AM — Suspended client "XYZ Distributors" (payment overdue)
Mar 30, 2026 12:00 PM — Logged out

Every single action recorded. Cannot be deleted or edited. This protects legally.
